

BONDEX

WATERPROOF CEMENT PAINT

"The Perfect Stucco Finish"

BONDEX is a decorative material designed especially for use on Stucco, Concrete and Cinder Block and Building Tile, Brick, Stone, Hollow Tile and other masonry *wall* surfaces. While described as a Waterproof Cement Paint, it is much more than a *Paint*, for it imparts color, waterproofs and preserves in one operation. It comes in the form of a dry powder and is made ready for use by mixing with cold water. It is furnished in White and sixteen Tints, which may be intermixed to produce an endless variety of shades. BONDEX is applied with a brush or spray. BONDEX *bonds* with the surface and forms an integral part of the wall itself. It has been styled "The Paint Eternal."

Directions for mixing and applying BONDEX are included in each package.

SELECTION OF COLOR

In selecting colors it should be remembered that owing to the varying porosity and suction in Stucco, Cement and Masonry Surfaces, the colors will slightly vary in depth of tone on different surfaces.
